## *Technical training for agencies involved in management of Eurasian watermilfoil*

**Wednesday, September 21, 2005 - 10 AM to Noon with lunch  
Room 352 - Shasta County Administrative Center  
1450 Court Street, Redding**

Dear \_\_\_\_\_:

Shasta-Trinity Cooperative Extension and the Shasta County Department of Agriculture are convening a technical training program for agency personnel involved in management of Eurasian watermilfoil; an invasive weed that threatens the ecosystem of the Fall River in Eastern Shasta County. Attendance for this meeting will be limited to 30.

The instructors will be Dr. David Spencer, Ecologist, with the Agricultural Research Services, stationed at UC Davis and Dr. John Madsen, Research Professor with the GeoResources Institute at Mississippi State University. Together they will provide you with valuable information about this pest and what is known both in the literature and by experience from other areas in the United States infested with this weed.

Lunch will be provided following the training. Please RSVP so we have a precise count for attendance and lunch.

Immediately, following lunch there will be a field trip to the Fall River Valley and a "Twilight weed tour" for the public in the evening.

I think you will find this meeting informative and useful. If you have any questions, please call the Extension office at the fairgrounds at 336-5784.

Sincerely,

Daniel B. Marcum  
Farm Advisor
